- 2024 **Southwest Contemporary**, "[Evans School Exodus](#)," Boyson, Madeleine, November 12, 2024

Artist Statement

I'm interested in experiences and objects that can reconfigure relationships to time, place and narrative. Looping and fragmentation in my practice have become gateways into these borderland spaces. As a magpie in and outside of the studio, collecting and sifting through materials and processes, my practice could broadly be described as one of collage and alter-making. Works have included ritualized and repetitive endurance karaoke performances that explore tensions between collective joy, fear, and narcissism, to multi-media installations that engage looping cycles of grief and violence between peoples as seen through the perspective of the land. In this ladder object-based work, I often begin from the act of making simple ink landscape paintings on paper that lead to and get absorbed by associative explorations in other media such as collage, sculpture, and video.
